

Prineas, Tony (from Australian Institute of Landscape Architects website)

BSc *Forestry*. (ANU) Grad Dip. Landscape. Architecture.

Has worked extensively in local and State government in managing, planning and design roles relating to State forests, the regional landscape and public open space.

He has been instrumental in formulating and implementing broader valued and community inclusive approaches in managing such areas.

He was responsible for mapping the scenic quality of the wet tropics of North Queensland through developing a predictive GIS model based on community preferences.

In 1995 he was largely responsible for mapping the ROSS – the regional Open Space System for south east Queensland.

He has advocated for and developed practical yet comprehensive approaches for planning State forests, city wide and regional park networks recognising economic, environmental and social determinants.

More recently he has drafted Brisbane City Council's Priority Infrastructure Plan for public parks and community facilities.

Tony has represented AILA on the Regional Landscapes and Open Space Advisory Committee for a number of years.
