

Van Der Sommen, Frank (from Charles Darwin University 2004 website)

BSc Forestry from ANU 1965. Master of Environmental Studies from Adelaide University. Currently a PhD candidate at CDU undertaking research in the role of trees in sustainable urban development.

Has been a District Forester involved in multiple-use of plantation and native forest management in the wetter parts, and flood plain, mallee and irrigated land management and rehabilitation in the drier parts of South Australia for 15 years.

Was a senior lecturer in natural resource management at what is now the Roseworthy campus of the University of Adelaide for 13years. Spent 3 years as Principal Vegetation Management officer with Conservation Commission of the NT.

He returned to the NT and currently undertakes private research and consults on vegetation management matters with an emphasis on environmental forestry.
