TMG v. 7, **Sample Project** Tag Type Groups and Their Associated Tags

The tag names in the yellow cells are the TMG tags that came with the Sample Project version I received with TMG v. 7. Your version may show other TMG default tags. Add any additional tags, either TMG tags or tags created by you, in the blue cells beside the appropriate Tag Type Group. When you create new tags, I suggest that you add your initials to the tag name, i.e. Probate – MFB; this will help you decide which tag, with the same name, you want to use. **Remember**, with the exception of the *Other Event* Tag Type Group, for each person in your project you can only mark one tag within a Tag Type Group as primary; so carefully pick the Tag Type Group associated with your new tag.
