USS INDIANAPOLIS

U.S. Navy

The **USS Indianapolis** is shown off the Mare Island Navy Yard, in Northern California, after her final overhaul and repair of combat damage. Civilian researchers say they have located the wreck of the **USS Indianapolis**, which was sailing the Philippine Sea between Guam and Leyte Gulf when two torpedoes from a Japanese submarine struck just after midnight on July 30, 1945.

rible and fascinating tales.

The expedition crew of Research Vessel *Petrel*, which is owned by Microsoft co-founder Paul Allen, says it located the wreckage of the *Indianapolis* on the floor of the North Pacific Ocean, more than 18,000 feet below the surface, the U.S. Navy said in a news release Saturday.

"To be able to honor the brave men of the *USS Indianapolis* and their families through the discovery of a ship that played such a significant role in ending World War II is truly humbling," Allen said in the news release.

WASHINGTON — Civilian researchers say they have located the wreck of the *USS Indianapolis*, the World War II heavy cruiser that played a critical role in the atomic bombing of Hiroshima before being struck by Japanese torpedoes.

The sinking of the *Indianapolis* remains the Navy's single worst loss at sea. The fate of its crew — nearly 900 were killed, many by sharks, and just 316 survived — was one of the Pacific war's more hor-

Footage from a remotely operated underwater vehicle shows wreckage of the *USS Indianapolis*, including the ship's bell at the bottom of the North Pacific Ocean.
