

AMERICAN FALLS FROM GOAT ISLE. NI-
AGARA FALLS. From this point the 1,060 feet of the
contour line of the American Falls can be seen to the best
advantage. Goat Island itself is a beautiful Natural Park
heavily timbered, surrounded on three sides by rushing
torrents and with a precipice 200 feet high extending
across the lower end. This view of the falls must be seen
to be properly appreciated.

POST CARD

Hi Babe,

We're in the hotel
dining room waiting
to be served. It's really
swank. And to there
are ~~no~~ sailors here,
all soldiers. Goody.
No more than we've seen
of the place I like it.
It's fun & full of hints.
Well, Happy New Year,
Love, Marjorie
