

K-355—BEAR IN YOSEMITE NATIONAL PARK
California Brown or Black Bear are frequently seen throughout the Park.

Although they are not ferocious, Bear are wild animals, and it is dangerous to feed or tease them. When taking pictures of them, a safe distance is a wise precaution.

Dear Norma & all
We just got back
from 3 days in Yosemite.
We saw one brown &
1 black bear. One hit a
man during the night
in camp next to us
so we slept inside the
tent & station wagon.
Our old favorite camp site
was closed under a ft
of snow but we got a chance
to see it - Love - Marjorie
