Missing records or approximate dates: Offers for employment in the 1800s were often verbal, with hire dates recorded by the railroad in employee registers. Employees were paid in cash in the 1800s and were required to sign a register (as opposed to receiving a multi-part paycheck) and may not have had any written proof as to when employment began. Registers may have been damaged or destroyed over time, so only approximate dates could be determined when computing seniority.

Data compiled and transcribed from original company roster by James Sponholz, August, 2010
